

Case Erectors New kit to square the boxes

TECHNICAL BULLETIN		<p>Starting from begin of 2016, SIAT has introduced a new kit "as optional" on F14x and F34x case erectors range.</p>
<p>Family Nr. Date</p>	<p>Case Erectors 001-2016 Feb 23, 2016</p>	
		<p>Features:</p> <p>This new kit has been specifically designed to handle difficult boxes.</p> <p>In all those cases where thin thickness, low quality cardboard, incorrect form, etc .., can make difficult correct shaping of boxes this device will help to avoid the possible romboidal deformation of boxes and the following wrong application of adhesive tape.</p>
		<p>Remarks:</p> <p>The kit must be ordered with the machine. Its installation is required during the production of the machine.</p> <p>It is not possible to install it in a later stage.</p>
